

Assignment 1, Study Requirement Engineering Process

1. Stakeholders

- Jamk students
- Jamk teachers/staff
- Jamk librarians

2. Feasibility study

To complete the project computers and softwares are needed. Also coders with Fullstack capabilities are needed since the new system must be a web page. The old library system is not in a condition to be just updated so the whole system must be built again, some parts may be usable in the old system(old libray databases). Even though the system has to be rebuilt it shouldn't be too big of a deal for competent coders. It will require some time nonetheless.
